

Soil Recovery Turf Spray

Eximo™ is a state of the art acid replacement soil conditioner powered by SynTech™, the world's only synthetic acid. Eximo is designed to be sprayed directly onto turf to solubilize calcium and other salts. Regular use will also lower soil sodium and bicarbonate levels and improve soil structure, nutrient availability and general plant health. Eximo will also reduce calcium carbonate in the soil and increase flocculation.

USE DIRECTIONS

Mix 32-64 ounces of Eximo in sufficient volume of water and apply to an acre of turf. Best results are achieved when Eximo is watered into the soil profile after application.

Fill the spray tank 1/4 full. Add Eximo while continuing to fill the tank with the agitation unit running to ensure proper mixing. EMS recommends this range for 60-75 gallons of water per acre applied weekly for three weeks and bi-monthly thereafter. Consult your local EMS dealer for usage rates in your region.

DISCARD

Rinse empty container w/water and discard as per federal, state and local regulations.

CONTAINS NON-PLANT FOOD INGREDIENTS

- <3% Nonylphenol
- >5% Coco Esters
- <27% Soya Fatty Acids, ME Esters

APPROVALS AND REGULATIONS

Non-D.O.T. & T.D.G. Regulated,
Non-Corrosive
Contains No Acid or VOCs

FIRST AID

If swallowed, drink two glasses of water. In case of eye contact, flush with water for two minutes. If symptoms persist seek medical advice. In case of contact wash thoroughly with soapy water. As with all chemicals, keep out of children's reach.
