NET CONTENTS 1L

DIRECTIONS FOR USE:

NO DAMP is recommended to control DAMPING-OFF diseases in ornamental and vegetable seedlings and cuttings. NO-DAMP may be used safely on all plants. Water the diseased plants with the diluted solution. For preventative control, water the propagating soil before seeding or placing cuttings.

NO-DAMP may be used at double strength for severe cases. Keep well stoppered. Do not store in metal container.

Dilute NO-DAMP as follows: 10 mL in 1litre of water; 50 mL in 5 litres of water.

FIRST AID:

If on skin, wash thoroughly with soap and water. **If in eyes**, flush with plenty of cold water for 15 minutes. Get prompt medical attention. **If swallowed, DO NOT induce vomiting.** Obtain medical attention at once or contact poison control centre IMMEDIATELY. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN AND DOMESTIC ANIMALS. Avoid contact with skin, eyes and clothing. Wash hands thoroughly with soap after using. Do not contaminate food or feed.

DISPOSAL:

1. Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank. 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. 3. Make the empty container unsuitable for further use. 4. Dispose of the container in accordance with provincial requirements. 5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the *Pest Control Products Act* to use a control product under unsafe conditions.

TOXICOLOGICAL INFORMATION:

Treat symptomatically.

RESISTANCE-MANAGEMENT RECOMMENDATIONS:

For resistance management, please note that No-Damp contains a Group M2 fungicide. Any fungal population may contain individuals naturally resistant to No-Damp and other Group M2 fungicides. A gradual or total loss of pest control may occur over time if these fungicides are used repeatedly in the same fields. Other resistance mechanisms that are not linked to site of action but specific for individual chemicals, such as enhanced metabolism, may also exist. Appropriate resistance-management strategies should be followed.

To delay fungicide resistance:

Where possible, rotate the use of No-Damp or other Group M2 fungicides with different groups that control the same pathogens.

Use tank mixtures with fungicide from a different group when such use is permitted.

Fungicide use should be based on an IPM program that includes scouting, historical information related to pesticide use and crop rotation and considers cultural, biological and other chemical control practices.

Monitor treated fungal populations for resistance development.

If disease continues to progress after treatment with this product, do not increase the use rate. Discontinue use of this product, and switch to another fungicide with a different target site of action, if available.

Contact your local extension specialist or certified crop advisors for any additional pesticide resistance-management and or IPM recommendations for specific crops and pathogens.

For further information and to report suspected resistance, contact Plant Products Co. Ltd. at (1-800-387-2449) or at (www.plantprod.com)
