

Golf Course & Landscape Fertilizers

Lebanon...Improving the Way Professionals Care For Turf

LebanonTurf is the professional division of Lebanon Seaboard Corporation. With over 60 years of experience, Lebanon is dedicated to supporting its customers through an extensive network of independent dealers and distributors. LebanonTurf is committed to environmental stewardship and has a product line or technology to fit all aspects of the turfgrass industries – Golf Course Superintendents, Property Managers, or Professional Landscapers and Tree care Specialists.

LebanonTurf continues to bring cutting edge technology and products to the market. From the Country Club MD water-dispersible fertilizer line for greens, tees, and other closely mowed turf areas to the long lasting and highly efficient and predictable release of MESA® Ammonium Sulphate/Methylene Urea Nitrogen and EXPO® Nitrogen/Sulphate of Potash, LebanonTurf has the product line to meet your agronomic and budgetary needs.

MESA is a unique 30-0-0 nitrogen source that combines Ammonium Sulphate with Methylene Urea in a single, homogeneous particle. The result is an extremely efficient and controlled nitrogen source that produces consistent, dark green colour without surge growth. Unlike coated nitrogen technologies, **MESA** does not lose its slow-release properties when cracked, chipped, crushed or broken. **MESA** technology is found in Lebanon's Country Club and ProScape brands.

EXPO is LebanonTurf's patented, single-particle, extended release Potassium Sulphate technology. **EXPO** is designed to deliver potassium to the turf in a reliable and predictable rate over a longer period of time, well beyond that of the standard Potassium Sulphate found in most fertilizers. Additionally, **EXPO** delivers controlled release nitrogen (derived from Methylene Urea). Each homogeneous particle has an analysis of 20-0-25. **EXPO** is found in Lebanon's Country Club, ProScape, and Woodace brands.

The Next Stage in the Evolution of Golf Course Fertilizers

Country Club MD is a new, innovative fertilizer from LebanonTurf developed to provide superior turf quality and golf course playability. Its unique, highly dispersing homogenous granule technology eliminates mower pick-up and contains sea kelp meal and humic acid to help suppress turf stress. Country Club MD features Meth-Ex slow release, Methylene urea nitrogen and is available in three popular formulations.

Help Give Grass Seed A Better Start At Life...

PennMulch Seed Accelerator is pelletized seed establishment mulch comprised of recycled newsprint, starter fertilizer, and Moisture Cell Technology – a patented super-absorbent polymer. It has a wide range of uses and is perfect for golf course superintendents, athletic field managers, irrigation companies, groundskeepers, and other turf and lawn care professionals.

PennMulch Seed Accelerator is the only seed establishment product containing patented Moisture Cell Technology. Comprised of super-absorbent polymers, Moisture Cell Technology can absorb up to 400 times its weight in water, which causes the pellets to expand. As the seedbed dries, the microscopic polymer crystals release water back into the soil, providing the new seedlings with the moisture they need to grow healthy and strong. Though there are a number of look-alike products on the market, university testing shows that none can match the results of PennMulch Seed Accelerator.

- University formulated and Patented – it's in the name!
- Increases turf density to minimize weed outbreak
- Conserves moisture to increase seed establishment
- Complete starter fertilizer included in mulch
- No raking necessary; easy to apply with a drop or certain rotary spreaders.
- Rate: 65 pounds per 1,000 ft² applies .65 lb. N, .91 lb. P, and .26 lb K
