

DG Gypsum™

Dispersing Granule Technology

- Dispersing granule formula
- Provides calcium and sulfur
- Increases water penetration into the soil
- Pelletized for easy application
- Loosens hard packed soil*

*Saline-sodic soils

SGN 100

Net Wt 25 kg (55.12 lbs)

Guaranteed Analysis

Calcium Sulfate Dihydrate (CaSO ₄ • 2H ₂ O) . . .	86.0%
Calcium (Ca)	21.0%
Sulfur (S)	16.0%
16.0% Combined Sulfur (S)	
Moisture content does not exceed	1.0%

Plant nutrients derived from calcium sulfate and mined gypsum.

ALSO CONTAINS NON PLANT FOOD INGREDIENT:

2% lignosulfonates as Water Soluble Binder

F292

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.regulatory-info-ap.com>

Directions for Use

Apply only as directed. For use on turf, in gardens, and around trees, shrubs and flowers. This product is pH neutral and will not increase soil pH. It may lower or reduce the soil pH of unproductive, highly alkaline sodium soils.

Applied to saline-sodic soils, the gypsum will loosen the heavy, hard packed soil, allowing water and air to penetrate and move freely in the soil.

When establishing a new turf area, apply 40-100 lbs. per 1,000 sq. ft. prior to seeding. Till or rake thoroughly into the top 3" of soil. Water well after application. High clay soils will require a higher rate.

For corrective action on established turf areas, apply 25-40 lbs. per 1,000 sq. ft. in the Spring and Fall. On higher clay or heavily compacted soils, apply 80 to 130 lbs. of product.

Apply 6 to 12 lbs. per 1,000 sq. ft. to maintain proper soil conditions on established turf. Apply 1 to 2 times per year, in the spring and fall.

For gardens, mix in 10-20 lbs. per 100 sq. feet. Place 1-2 cups around each rose bush in the Spring and Fall. For trees, shrubs and flowers, apply 2-4 cups around the base of smaller plants and 4-6 cups around the base of larger plants.

To repair larger areas damaged from winter salt and fertilizer apply 20-40 lbs. per 10 sq. feet. For smaller areas, such as animal spots, apply ½ - ¾ cup per square foot.

To aid in the generation of compost, spread approximately 2 cups over the top of the material in the cart as it is dumped into the compost pile. Treat daily, adding 2 cups per day until the compost is complete. This will take approximately 1 ½ weeks.

For all applications:

Immediately after application, for optimum results and to disperse the granules, apply a minimum of 0.1 inches of water. If a second watering is needed to complete the dispersion, wait 10 minutes and again apply a minimum of 0.1 inches of water.

Fineness of Grind

Prior to pelletizing or testing by wet sieve method:

Minimum Passing	U.S. Standard Sieves
100%	8 MESH
99%	20 MESH
79%	40 MESH
66%	60 MESH
60%	100 MESH

IMPORTANT: READ BEFORE USE:

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or Buyer accepts the following Warranty Disclaimer and Limitation of Liability:

WARRANTY DISCLAIMER and LIMITATION of LIABILITY:

Manufacturer warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions. Manufacturer makes NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
