

Brandt™ Converge SRN 30-0-0

Slow Release Nitrogen Fertilizer

30-0-0

No Phosphate Fertilizer

Guaranteed Analysis

Total Nitrogen (N)	30.0%
12.0% Urea nitrogen	
18.0% Other water soluble nitrogen*	

Derived from triazone, methylene urea and urea.

* 18% Slowly available nitrogen from triazone and methylene urea.

General Information

BRANDT CONVERGE SRN 30-0-0 is a slow release nitrogen product that is uniquely engineered to obtain constant growth pattern of plants and improve root development and overall plant health. It utilizes the microorganisms in the soil to release the nitrogen at the proper rate for the plants. There are minimum losses of NO_3 and NH_3 from the soil, which reduces the total nitrogen needs without sacrificing performance, yield and health of the plant. This product is non-burning, so foliar contact will not harm the plants.

Rate Recommendations

Turf Application: For professional use, apply throughout the growing season on cool, warm and transitional grasses. This product is ideal for low volume spraying. Dilute with water according to desired nitrogen rate, typically 0.25-0.9 lb nitrogen per 1,000 sq ft. In the absence of specific nitrogen recommendation, apply 4-20 fl oz product per 1000 sq ft or 1.5-7 gallons per acre.

Pounds of Nitrogen	0.25	0.33	0.5	0.75	0.9	3.15
Per Fluid Ounce	10	13.5	20	30	37	128 (1 gal)

Crops - Foliar Application: Use 2-4 quarts of this product per acre per application throughout the growing season as a maintenance program. Use a minimum of 10 gallons per acre with ground spray equipment. DO NOT apply when plants are under moisture stress. DO NOT apply to deciduous tree crops during bloom.

Crops - Soil Application: Use 1-4 gallons of product per acre as a pre-plant or side-dress application. *Fertigation:* This product can be applied via drip or sprinkler irrigation at a rate of 2-12 quarts per acre. DO NOT apply with phosphate based fertilizers or highly alkaline solutions during the same irrigation cycle.

Optimum rate of application will vary depending on treatment interval, soil properties (such as pH, organic matter content, texture), weather conditions, time of year, plant species and its nutrient requirements. For best results, follow soil/tissue test recommendation.

Mixing and Handling Instructions

Fill mix tank with half of required water volume and begin agitation. Add products in this order, mixing thoroughly after each addition: adjuvants, pesticides, then fertilizers. Fill tank with remainder of water and continue agitation until solution is completely mixed. Check chemical mixture compatibility using a jar test prior to application.

Precautionary Statements: Based on currently available data, this product is not classified as a hazardous substance. However, observe good industrial hygiene practices. Wash hands after handling. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. Dispose of contents/container in accordance with local authority requirements.

LIMITED WARRANTY: Brandt Consolidated, Inc. ("BCI") warrants that the Product conforms to the chemical description given on this label and is reasonably fit for the purpose stated when used in accordance with label directions under normal conditions of use. BCI and Seller make no other warranties, express or implied, including warranty of merchantability or fitness for a particular purpose. Buyer and User accept all risks arising from any use of this Product. To the extent allowed by law, BCI and the Seller shall not be liable to the Buyer or User of this Product for any consequential, special, incidental or indirect damages.
