

Professional & Landscape Turfgrass Seed

Even-Spray Turfgrass Seed – We Help Make All Of Your Seeding Projects A Success!

Whether you are seeding a golf course, athletic field, public greenspace, or residential landscape setting, Even-Spray has the seed variety or blend to meet your specific application needs. With PICKSEED as our primary supplier partner, count on innovative research, developmental efforts, comprehensive quality control processes and an unequalled reputation for outstanding turfgrass performance and consistently high seed quality. Even-Spray is proud to distribute PICKSEED in Manitoba and Northwestern Ontario.

Bentgrass Varieties for Greens:

Even-Spray Custom Bentgrass Blend

- Top-performing 50/50 blend of 777 and MacDonald – two proven-superior Bentgrass varieties.
- Rapid to very rapid germination: 3 – 5 days (6 – 10 in cooler weather. Aggressive against Poa Annua.
- Specially formulated to improve the overall quality of putting greens.
- Very fine leaf texture; attractive dark green colour.
- Improved resistance to Dollar Spot, Brown Patch, and Snow Mold.
- 25 lb. (11.34 kg.) pail.
- Seeding Rate: 1 – 1½ pounds / 1,000 ft².

MacKenzie Coated Bentgrass

- High quality Bentgrass well suited for greens and tees.
- Dark bright green colour, very fine leaf texture.
- Very rapid establishment; competes well against Poa Annua.
- Very high uniformity, disease, and summer stress resistance.
- Wide genetic diversity.
- 25 lb. (11.34 kg.) pail.
- Seeding Rate: 1 – 1½ lbs. / 1,000 ft²

Dominator Certified Bentgrass Blend

- Certified blend of top-performing 007 and 777 bentgrasses.
- Very high density; increased Poa annua resistance.
- Exceptional heat and stress tolerance – excellent summer performer, low light performance, and cool season growth habits.
- 25 lb. (11.34 kg.) pail.
- Seeding Rate: 1 – 1.5 lbs./1,000 ft² for new turf and 2 – 3 lbs./1,000 ft² for overseeding / interseeding.

Penncross

- The most specified bentgrass for putting greens around the world.
- Dark green, uniform color.
- Exceptional heat, cold, and wear tolerance.
- Withstands consistent low cutting heights.
- Excellent recuperative ability from physical damage such as ballmarks.
- 25 lb. (11.34 kg.) bag.
- Seeding Rate: 1½ lbs. / 1,000 ft²

Pure Select Creeping Bentgrass

- Striking medium green color; dense, upright growth habit.
- Fast aggressive recovery.
- Exceptional disease resistance.
- Strong heat, cold and wear tolerance.
- Quick spring green-up.
- Exceptional ability to compete against Poa-annua.
- 25 (11.34kg) pail.
- Seeding Rate: 1 – 1.5 lbs./ 1,000 ft²

T-1

- Remarkable genetic colour - #1 NTEP ranked.
- Aggressive, makes visible gains on Poa Annua each year, heals ball marks and divots quickly.
- Can be used interseeding into existing turf.
- 25 lb. (11.34 kg.) pail.
- Seeding Rate: 1 – 2 lbs. / 1,000 ft². Double rate for interseeding.
