

Specialty Soil Surfactants & Plant Health Products

Precision Laboratories RESCUE EZ-Tabs Soil Surfactant

Precision Lab's RESCUE EZ-Tabs are a unique blend of polymeric surfactants designed to increase water infiltration, improve water retention, provide a rescue treatment for localized dry spot (LDS) and reduce product handling. RESCUE EZ-Tabs may be used alone or as part of a comprehensive water management program.

An easy-to-use soluble tablet designed to hydrate the plant root zone and provide a rescue treatment for hot spots.

- Use with the PelletPro™ Applicator Hose-end Gun.
- Can be used alone as a rescue application for hot spots on turf or as part of a comprehensive water management program – complete flexibility for the turfgrass manager.
- Use Rate: One tablet covers approximately 12,000-18,000 ft² (1,115-1,672 m²) of turf. Severity of localized dry spot, water temperature, water pressure and application technique may cause coverage to vary. Each EZ-Tab disperses in approximately 40 minutes.
- Use on golf course turf, sports turf, and residential lawns.
- 24 x 170-Gram Tablets per Case.

Aquatrols Advantage Plus Seaweed

A convenient supplement to your regular fertility or surfactant program. Advantage Plus Seaweed pellets promotes fast recovery of stressed turf and stimulates root growth leading to healthy, vigorous turfgrass.

Use Advantage Plus Seaweed pellets in conjunction with your regular hand watering and syringing to improve overall turf performance. Improved, balanced .01-.01-.03 + 0.2% Iron and Seaweed Extract formula.

- Promotes fast recovery of stressed turf while stimulating root growth.
- Application Rate: One Advantage Plus Seaweed pellet will treat approximately 4 to 6 average-sized greens, watering at a rate of roughly 10 minutes per green.
- One box contains 6 x 226-gram (8 oz.) pellets.
- Easy to use with the PelletPro™ Applicator Gun.

PelletPro™ Applicator Gun

AQUEDUCT® FLEX Granular Soil Surfactant

An all-new fast acting dual-action granular soil surfactant that treats and prevents localized dry spot (LDS). Aqueduct® Flex provides rapid recovery of stressed turf, with visible results in as little as 3 DAYS when applied at the treatment rate. Aqueduct® Flex also provides up to 30-DAY PROTECTION against the development of LDS when applied on a monthly basis.

- Designed to fit into your turf or landscape management program.
- Safe to use on all turf varieties and areas - golf course greens, tees, fairways, athletic fields, and residential lawns. It can also be used on ornamental gardens, landscapes, trees, and shrubs.
- Does not need to be watered in when applied.
- Maintenance Rate – 0.5 kg. /100m² (1.0 lb. /1,000ft²) every 30 days.
- Recovery Rate – 1.25 kgs. /100m² (2.5 lbs. /1,000ft²).
- 20-Kilogram resealable poly bag.

Manage Clipping Yields While Elevating Your Turf To A New Level of Playability

Primo MAXX is a unique management tool that allows golf course superintendents to better manage turfgrass on their courses. It does this by actually altering the way turfgrass grows, resulting in more compact, healthier grass that produces fewer fresh weight clippings by up to 50% and a reduction in grass height of up to 20% for up to four weeks.

Benefits in using Primo MAXX:

- Can be used as a pre-stress conditioning tool to prepare turf for summer extremes such as heat and drought.
- Less clipping yields results in a healthier cut – more predictable, consistent playing conditions and better turf wear recovery.
- Reduced wear on equipment, lower labour costs, and reduced fuel consumption.

Application Rate for Primo MAXX:

- 4 ml / 100m² monthly for Bentgrass.
- 3.78 litre container.
- PCP: 26989
